Re: Preschool Booster for Junior Infant Students.

Dear Parents,

Children need to get booster doses of some vaccines to protect them against diseases.

It is recommended that when your child is aged 4- 5 years they should get two vaccines.

- The 4 in 1 booster to protect them against diphtheria, polio, tetanus and whooping cough.
- A second dose of the MMR to protect against measles, mumps and rubella.

If your child has not had the preschool booster yet, then please make an appointment with your GP or practice nurse to get these immunisations.

Your child needs to be protected from these diseases when they start school.

Further information on immunisations is available from:

- Your G.P. or Practice Nurse.
- The Immunisation Office on 074 9191758 or 074 9191759.
